TACTICAL EMERGENCY CASUALTY CARE

Date: April 20, 2021 **Registration deadline: 03/12/21**

Times: 0800-1700 hours

Location: NITAB
527 Colman Center Drive
Rockford, IL

Instructor: Mercy Health System instructors

Member Fee: \$0 Non-Member & Member Non-Sworn Fee: : \$100

This 8-hour course covers topics designed to decrease preventable death in the tactical situation. Topics include hemorrhage control; surgical airway control and needle decompression; strategies for treating wounded responders in threatening environments; caring for pediatric patients; and techniques for dragging and carrying victims to safety.

TECC delineates care for patients based on the situation and available resources and is divided into three distinct phases. These phases have been well-proven by TCCC-trained military personnel:

Direct threat care: Care that is rendered while under attack or in adverse conditions.

Indirect threat care: Care that is rendered while the threat has been suppressed but may resurface at any point.

Evacuation: Care that is rendered while the casualty is being evacuated from the incident site. TECC focuses on medical care during these phases and provides guidelines for managing trauma in the civilian tactical or hazardous environment. While TECC has a tactical slant, it takes an all-hazards approach to providing care outside the normal operating conditions of most EMS agencies, such as responding to a mass casualty or active shooter event.

Topics will include: Patient assessment, Tourniquets, Wound packing/trauma dressings, recovery position/chest seals/NPA, TECC guidelines, PACE methodology/IFAK equipment, direct/indirect threat movement/care.

There will be skills set stations throughout the day with scenario practicals towards the end of the day.

TECC guidelines are a set of medical guidelines for use during high-threat operations where there is ongoing risk to both the patient and the provider. TECC training provides medical guidance for those who may find themselves taking care of the injured during hostile, non-permissive, high-threat incidents.

Our TECC curriculum is developed from NAEMT's Prehospital Trauma Life Support (PHTLS) Committee based on guidelines from the Committee on Tactical Emergency Casualty Care (Co-TECC) and the Tactical Combat Casualty Care (TCCC) program.

This course has been certified by the ILETSB and approved to meet the following mandates:

- | | |
|--|--|
| <input type="checkbox"/> Civil Rights | <input type="checkbox"/> Constitutional & Proper Use of Law Enforcement Authority |
| <input type="checkbox"/> Cultural Competency | <input type="checkbox"/> Human Rights |
| <input type="checkbox"/> Intro Mental Health Awareness | <input type="checkbox"/> Law Updates |
| <input type="checkbox"/> Lead Homicide Investigator | <input type="checkbox"/> Use of Force (must include scenario based/similar training) |
| <input checked="" type="checkbox"/> Procedural Justice | <input type="checkbox"/> Sexual Assault Investigator Training |
| <input type="checkbox"/> Psychology of Domestic Violence | <input type="checkbox"/> Sexual Assault Trauma Informed Response |

To receive a State Certificate / training credit for the above listed mandates, no more than 10% of the course hours can be missed.

"NITAB will be following the current COVID-19 IDPH & ILETSB Requirements"

"Enrollment in MTU#2 classes is limited to ON DUTY law enforcement/correctional officers or MTU#2 member agency employees."
